

Coronavirus Disease 2019 (COVID-19)

Information for Clinicians on Investigational Therapeutics for Patients with COVID-19

Updated April 25, 2020

There are no drugs or other therapeutics presently approved by the U.S. Food and Drug Administration (FDA) to prevent or treat COVID-19. Current clinical management includes infection prevention and control measures and supportive care, including supplemental oxygen and mechanical ventilatory support when indicated.

The National Institutes of Health have published [interim guidelines for the medical management of COVID-19](#)  prepared by the COVID-19 Treatment Guidelines Panel.

These guidelines contain information about investigational therapeutics and will be updated as new information emerges and drugs and other therapeutic interventions are approved for use by FDA.

Persons seeking information about registered clinical trials for COVID-19 in the United States can search for such information here: [ClinicalTrials.gov](#) .
